Fuchsia Muriel

FUCHSIAS

As Presented By . . .

EVANS & REEVES

"It's Different"

255 So. BARRINGTON AVENUE
WEST LOS ANGELES, CALIF.
PHONE: W. LOS ANGELES 36528

EVANS & REEVES NURSERIES are celebrated as being the home of one of the finest collections of Fuchsias in the world, comprising very many species and varieties, many of the last being original ones of Mr. Jack Evans.

While we have not listed all the Fuchsias which can be seen in our Nurseries, we have carefully selected those which we believe to be outstanding types. We consider that the list offered here contains the best Fuchsias which can be procured and grown.

CULTURE OF FUCHSIAS

Nearly all the species occur naturally in Mexico, Central and South America in comparatively cool regions, with an abundance of atmospheric moisture in addition to plenty of natural rainfall. To imitate these conditions as nearly as possible is to insure success in their culture.

While most Fuchsias within a reasonable distance of the coast, particularly the single flowered types, will grow and bloom well in the full sun, the majority of them will be happier if planted in a cool situation with protection from the direct rays of the sun during the heat of the day.

Before planting, the ground should be deeply and thoroughly worked, and incorporated with it plenty of well rotted manure and leaf mold. The soil should never be permitted to dry out during the summer months. A mulch of manure, leafmold, peat moss or leaves should be kept on the top of the ground to protect the roots of the plants so that the ground never becomes hard or baked. If the soil is thin or poor, the plants should be fed from time to time throughout the spring and summer season. Where the soil is naturally rich or has been made so by the addition of prepared fertilizers, one or two applications of fertilizer during the summer will be found sufficient. Drenching the foliage of the plants in early morning and late afternoon or evening will be found extremely beneficial, as this serves to give them the cool atmospheric conditions they are so fond of.

No flowering shrubs we grow will give us more wealth of color and prove more satisfactory if intelligently used. By pruning the plants back at different seasons, some as early as August and others as late as March, some will be in bloom every day and month of the year. Never under any circumstances put lime where Fuchsias are growing or are to be grown.

BASKETS

We keep in our Nurseries large assortments of various types of Fuchsias in hanging pots and baskets and they are extremely beautiful and satisfactory growing in this way. These baskets should be fed with liquid manure every 30 days during Spring and Summer to keep them in good condition and should be kept in a cool, sheltered, place away from sun and wind.

FUCHSIA FERTILIZERS

We are glad to supply our clients with pure leaf mold of the finest quality, in addition to old manure and the best commercial fertilizers.

Good plants cannot be successfully grown without the proper food!

Prices quoted on application.

Complete Landscape Service and Supervision

Prices—(Except where noted): 4" pots, 35c; 6" pots, 75c; 8" pots, \$1.50. Specimen plants, Standards and Baskets, at special prices according to size, from \$2.00 to \$15.00.

Symbols—(E & R) Originated by EVANS AND REEVES "L", low growing; "M", medium growing; "T", tallgrowing.

BRENTWOOD. (E & R 1936). At last! The world's first all white double fuchsia. After years of patient work, we finally developed this outstanding novelty and offered it to the plant-loving public for the first time last year. "Brentwood" has charming, delicately formed blossoms of snowy white, the flowers being double and of medium size. The plants are compact and bushy, of low growth, making an ideal pot specimen. They should be grown in shade and not used in sunny locations where the blossoms will have a tendency to burn. 3" pots, \$0.75.

RED AND WHITE

AVIATOR. (Originated by Diener and introduced by us.) Long beautifully shaped flowers, corolla white, with long twisted sepals of deep rose-red. Vigorous grower. The most vigorous single white Fuchsia. (T).

CATALINA. (E & R 1937). A magnificent new Fuchsia bearing giant double flowers of snowy white, beautifully offset by long, wide sepals of rich crimson. Tall, extremely vigorous grower with heavy stems and good foliage. (T). 4" pots, \$0.50.

DAINTY LADY. Large, perfectly formed flowers, corolla white-streaked carmine, sepals deep red, semi-double. Very compact habit, making perfect pot plant. A beauty! (L).

FAIRY QUEEN. (E & R 1937). A charming new variety greatly admired by all who have seen it. Lovely, semi-double flowers of ivory white, with sepals of soft pink. Healthy, bushy grower and constantly in bloom. (M).

LEO. (E & R 1939). Giant double flowers in great clusters all over the plant. Corolla is white, heavily flushed and veined with rose and carmine with wide recurved sepals of scarlet and very long deep pink tube. The plant is a loose grower and should be staked to show off the spectacular blossoms. (T) 4" pots, \$0.50.

MARLBORO. (E & R 1937). Tall compact habit with profusion of semi-double white flowers veined red, sepals wide and flat of deep scarlet. (T).

Garden Renovation and Consultation

MRS. GLADSTONE. Very large double flowers of creamy white, lightly veined with deep pink, sepals of deep pink. The beauty of the flowers make up for the rather weak habit of the plant. (M).

PASADENA. (E & R 1938). A stunning new variety that simply bursts with bloom. Large flaring double flowers of snowy white, veined pink, set off by reflexed sepals of deep rose pink. Fine foliage and compact habit. Highly recommended. (M).

PRIDE OF ORION. Very long, loose double flowers, corolla ivory white, streaked cerise, wide deep crimson sepals. One of the aristocrats of the family. No collection should be without this one. (M).

SNOW FLAKE. Semi-double flowers of ivory white with petals loosely arranged, red streaked, with sepals bright red. Very fine. (T).

AGNES REEVES. (E & R 1939). Charming flowers of loosely arranged habit, corolla white, flushed and veined with soft rose, reflexed sepals of light red. Flowers seem to almost dance on the plant. (M). 4" pots, \$0.50.

RED AND PINK

FASCINATION. One of the showiest of all. Large loose double flowers, beautiful rosy-pink corolla, with deep pink sepals. Very free blooming. Well named. (M).

MME. CARNOT. One of the best of the new importations. Very large, full, double flowers of great beauty. Corolla soft pink, streaked carmine, reflexed sepals of deep rich pink. Add this one to your collection. (M).

ROSECROFT. An origination of the Rosecroft Gardens at Point Loma, known as the "Holly Leaf Fuchsia." Long, beautifully formed blossoms of striped, pink corolla, and long curved sepals of carmine. Foliage resembles Holly leaves. (L). 4" pots, \$0.50.

SANTA MONICA. (E & R 1935). Particularly valuable because of its late blooming habit, flowering profusely through the fall right up until Christmas time. Large double flowers of flesh pink, streaked cerise, with bright red sepals. One of the heaviest producers of flowers on the list. (M).

WESTWOOD. (E & R 1936). A climbing Fuchsia simply smothered with long single flowers of soft pink, with vivid red sepals. A plant of this growing up the side of a building or trellis is an unforgettable sight. (T).

REDS AND SHADES OF RED

BEVERLY HILLS. (E & R 1936). We are proud to offer what we consider one of the finest of the new Fuchsias. This plant is a strong grower with enormous single flowers, corolla being a wonderful shade of burgundy red. Long elegant sepals of glowing pink with white striping. An aristocrat among the singles. (M). 4" pots, \$0.50.

Complete Landscape Service and Supervision

CARDINAL. (E & R 1938). A splendid new Fuchsia and a great improvement on the old red Monarch. Very strong semi-climber. Giant single scarlet red flowers in great profusion. Highly recommended. (T). 4" pots, \$0.50.

HUGH EVANS. (Hazard 1935). A handsome, trailing variety with long single flowers of crimson and burgundy red. Useful for walls or banks or can be staked up to display clusters of blossoms. 4" pots, \$0.50.

PRESIDENT. Extremely vigorous, tall-growing plant with reddish foliage. Large single flowers of dark burgundy red. Particularly valuable as a climber or for tall background specimen. (T).

PRIDE OF EXETER. An old favorite and one of the best. Very large, semi-double flowers with long light rose colored sepals, cerise petals suffused with violet. A fine garden Fuchsia. (M).

PINK

DISPLAY. Saucer shaped wide corolla, with deep pink petals and clear pink sepals. An old favorite, profuse bloomer hardy and vigorous. A good garden Fuchsia. (M).

GLENDALE. (E & R 1936). A very strong, tall growing, vigorous plant with a profusion of dainty single coral-pink flowers. A novelty of great merit. Will stand full sun. (T).

MRS. JOHN D. FREDERICKS. (E & R 1936). One of our best novelties. A fast-growing plant with literally hundreds of dainty salmon pink blossoms. Should be allowed to grow into a large spreading specimen and is one of the Fuchsias that will grow in full sun. (T).

MME. AUBIN. Vigorous grower, drooping habit, fine large foliage. Single flowers of orange pink, tube and sepals of waxy pink. Very effective when staked up to show the blossoms. (M).

PINK PEARL. Large semi-double flowers, light waxy pink sepals, soft rose pink petals. Very showy. (M).

THE DOCTOR. Deep pink to rose corolla, long pointed sepals of soft salmon pink. Semi-trailing. A fine variety! (M).

ORANGE

AURORA BOREALIS. (Speciosa). Bright orange red corolla with narrow pointed sepals of soft pink tipped green. Vigorous grower, and profuse bloomer. One of the best of the old time Fuchsias. (M).

AURORA SUPERBA. (Salmon Queen). Large single flowers, light apricot sepals, vivid orange petals. A magnificent Fuchsia. (M).

Garden Renovation and Consultation

CALIFORNIA. (E & R 1936). Tall, vigorous grower, light green foliage, good sized flowers of bright orange, with sepals of coral pink. One of the tallest and most vigorous of all Fuchsias and one of the best for making trees. (T).

JANE EVANS. (E & R 1939). Large single blossoms of coral and salmon with petals a vivid shade of salmon and cerise. Beautiful foliage and very husky and vigorous habit of growth. (T). 4" pots, \$0.50.

JUNE CAROLYN. (E & R 1939). Long single flowers of green tipped, orange-pink sepals and corolla of coral blended with carmine. Vigorous tall grower with fine foliage. (T). 4" pots, \$0.50.

LOS ANGELES. (E & R 1938). Beautiful long single flowers of waxy coral-apricot with petals of deep orange suffused with vermilion. Vigorous grower with lustrous light green foliage. (T). 4" pots, \$0.50.

ORANGE GLORY. (Mrs. Rundle). Very long, single flowers, long delicate salmon pink sepals, vivid orange corolla. Fine for a trellis. (M).

SUNSET. (Niederholzer). A beautiful new variety with open bell shaped single flowers of glowing coral, set off by sepals of salmon pink, with green tips. (M). 4" pots, \$0.50.

SWANLEY YELLOW. A fine old favorite, with very large ornamental foliage. Great clusters of long single flowers of orange-yellow and salmon sepals. (M).

PASTEL SHADES

COUNTESS OF ABERDEEN. (Schneewitchen). This one will be near the top of the list in any collection. Dainty waxy white single flowers, delicately tinted pink. Compact habit, deep green foliage. (M). 4" pots, \$0.50.

MARYBETH. (E & R 1939). Entirely new variety with quite different coloring. Very long elegant white sepals, tinted lilac, corolla of soft salmon, medium growth with drooping habit. (M). 4" pots, \$0.50.

TREASURE ISLAND. An entirely distinct hybrid originated by Victor Reiter, and a very beautiful Fuchsia. Sepals are satiny, Paul Neyron rose color with pale green tips, corolla is veined in deeper shades of Neyron rose with a pale mallow purple around each vein. Especially large, well formed bud for the size of the bloom, with sap green tips. A very fine Fuchsia for a shady location. (M). 4" pots, \$1.00.

Complete Landscape Service and Supervision

PAMELA. (E & R 1939). A charming new variety with quite distinct coloring. Good size single flowers, petals of lilac edged scarlet. Long green tipped white sepals, tinted lilac on under side. Vigorous grower with excellent foliage. (M). 4" pots, \$0.50.

MRS. W. H. WARE. (Hazard & Hazard). Semi-double, vigorous, fine for hanging baskets, corolla orchid, sepals delicate pink, well reflexed and very conspicuous. A beautiful new fuchsia. 4" pots, \$0.50.

PATTY EVANS. (E & R 1937). We are proud to announce this new contribution to the family of Fuchsias. This Fuchsia has been acclaimed by many as the most beautiful of all, and we are inclined to agree. It resembles a vastly improved Rolla, of which it is a seedling. The large double flowers are of beautiful substance and form with corolla of pure white and long elegant sepals of waxy white, tinted a soft rose on the under side. The plant is extremely vigorous, growing rapidly to a height of five to six feet. We believe "Patty" to be the finest of the many Fuchsias introduced by us. 4" pots, \$0.75.

ROSE OF DENMARK. This beautiful and scarce variety, although not a large flower, is absolutely in a class by itself. Medium size single flowers, the corolla being a soft lustrous rose, with waxy white sepals of delicate flesh color. (M). 4" pots, \$0.50.

MAUVE, LAVENDER AND LILAC

ABBE FARGES. Medium sized, single flower, red sepals and silvery lilac petals. Free bloomer, rather tall, compact habit. Usually blooms throughout the winter. A good garden Fuchsia. (T).

CAROLYN. A new hybrid with lovely double flowers of soft rosy lilac, and sepals of deep pink. A rather low grower. A fine Fuchsia. (L).

GYPSY QUEEN. (Introduced by E & R). The queen of the mauve sorts! Enormous double flowers of rich rosy-mauve with heavy deep-red sepals. Tall, vigorous grower and a variety that must be included in every collection. Many enthusiasts place it number one on the list. 4" pots, \$0.50.

MIRIAM. (E & R 1937). Dainty semi-double of periwinkle blue with entirely reflexed petals of vivid pink. About the nearest thing to blue that we have seen. Low drooping habit. (L).

VIOLET AND PURPLE

ALPHAND. Beautiful double flowers of brilliant dark violet with crimson sepals of shining dark red. Loose open habit which requires staking. (M).

Garden Renovation and Consultation

- ANDRE LE NOTRE.** Extra large, double flower with long tube. Corolla of deep prune color with broad crimson sepals. Requires staking to hold up heavy blossoms. (M).
- AZTEC.** (E & R 1937). In full bloom, this is one of the spectacular Fuchsias. Beautiful large flowers on a strong vigorous plant, the full double corolla is a vivid shade of violet, suffused with cerise and rose, and set off by sepals of rich red. Very effective. (M).
- BLUE GOWN.** Showy double flowers, prune colored with vivid red sepals. A beautiful Fuchsia. (M).
- DAMPSON.** (Rosecroft origination). Single flowers of intense deep violet, set off with brilliant red sepals. One of the darkest colored Fuchsias. (M).
- DR. VANCE.** (E & R). Large loose double flowers, vivid red sepals, violet petals flushed cerise. Vigorous grower. (T).
- HERON.** (Otto). Probably the best of all the single purple types. Very large prune colored flowers with deep crimson sepals. A tall grower and profuse bloomer. (T).
- HENRI POINCARÉ.** Single Red and Violet. Good.
- JULES DALOGÉ.** Giant double flowers, deep red sepals, violet petals flushed with lavender and rose. Vigorous and husky. One of the most beautiful of all. (T).
- LORD BYRON.** Comparatively dwarf growing, very neat habit, medium sized, single flowers of red, and dark violet purple. One of the darkest of all Fuchsias. (L).
- MR. GLADSTONE.** Large double flowers of rich purple. Makes a gorgeous display in full bloom. Splendid old type. (T).
- ROYAL PURPLE.** Handsome semi-double flowers of dark royal purple and dark crimson sepals. The darkest of all the purple varieties. (M).
- ROSE QUEEN.** A very distinct variety, extremely vigorous grower with lovely light green foliage. Large double flowers of clear violet, flushed lilac with rose shadings and bright red sepals. (M).

THE CHIEF. (E & R 1936). This is one of our finest novelties, and we believe the name we have given it aptly describes this beautiful double flower of dark rich violet with petals flushed cerise and the sepals of dark carmine. (T). 4" pots, \$0.50.

- VINCENT.** Enormous flowers, violet purple corolla, suffused carmine, carmine sepals. One of the fine doubles. (T).

MISCELLANEOUS

- AMELIA AUBAN.** Single white, tube and sepals, rosy cerise corolla. Very attractive. (M).

Complete Landscape Service and Supervision

- AMY LYE.** One of the most satisfactory of all Fuchsias, having strong, compact habit of growth and a profusion of blossoms throughout the entire season. Single flowers of coral-orange, with waxy white sepals. Highly recommended. (M).
- BLUE BOY.** Strong, rampant grower, good garden Fuchsia. Medium sized single flowers, white sepals tinted flesh, violet blue petals changing to violet rose. Will grow in full sun. (T).
- CONSTANCE.** (George Budgen originator). Semi-double flowers, blue tinted pink, with flesh colored sepals. Strong compact habit. (M).
- COVENT GARDEN.** Large single flowers, waxy white sepals and rich rose petals. Loose, semi-trailing habit. A very beautiful Fuchsia and particularly fine either on a trellis or in a basket. (L).
- ERNEST RENAIN.** Deep rose pink, coral and white shading at the base, white tube and waxy white sepals. (M).
- NONPAREIL.** A variety that always attracts a great deal of attention. Large semi-double flowers of rich, rosy, blue-violet with sepals of ivory-white, tinted flesh. Very free flowering and showy. (M).
- STARLIGHT.** A slow growing plant with fine heavy foliage and beautiful long blossoms of quite pure substance. Tube and sepals of waxy white with petals of deep rose suffused carmine. (M). 4" pots, \$0.50.

TRIPHYLLA TYPES

All the Fuchsias of this type are of a rather bushy, compact habit with a particularly fine dark lustrous foliage, and clusters of long tubular flowers. Most of them stand the full sun very well, and make particularly fine ornamental shrubs.

- G. BONSTEDT.** Clusters of long coral red single flowers dark glossy plum colored foliage.
- KORALLE.** Light green glossy foliage, flowers of rich coral.
- LADY CLAIRE.** (E & R 1934). Very attractive, lustrous dark green foliage, clusters of cerise and orange colored flowers, which are rather shorter and heavier than the type. The plant itself a stronger and taller grower than most of the triphylla hybrids.
- LEVERKUSEN.** Large single flowers with rosy salmon corolla and sepals. Free flowering. Very fine.
- SOUVENIR DE HENRY HENKEL.** Medium growth, bushy habit. Long tube and sepals of deep pink with orange pink corolla. Plum colored foliage.

TRAILING TYPES

SUITABLE FOR HANGING BASKETS,
WINDOW BOXES, WALLS, ETC.

- AURORA SUPERBA.** Elsewhere described.
- BALKAN.** Trailing habit. Dainty, light pink, single flowers. Very pretty.

CASCADE. (Dr. Laglen). A beautiful new hanging Fuchsia that should absolutely be included in every collection. The large single flowers are a lovely combination of pink, salmon and light cerise, with the longest sepals of any Fuchsia known. Cannot recommend this too highly. 4" pots, \$0.50.

COVENT GARDEN. Elsewhere described.

HUGH EVANS. Elsewhere described.

MARINKA. Semi-trailing. Very showy, large, single flowers of rich red with sepals of same color.

MARJORIE HILGERS. (E & R 1939). A beautiful new basket variety of semi-trailing habit. Large double flowers of delicate shell pink with deeper veinings. Recurved sepals of rich deep pink. A fine addition to the basket types. 4" pots, \$0.50.

MME. FORTE. Trailing habit. Long flowers of salmon-cerise with waxy, white sepals, tinted rose. Flowers do not discolor.

NONPAREIL. Elsewhere described.

ORANGE GLORY. Elsewhere described.

MURIEL. Giant single flowers of transparent cherry color, set off by long, twisted sepals of crimson. Strong vigorous grower and prolific bloomer. A hanging basket of this Fuchsia in bloom is one of the most striking sights imaginable. Especially good. 4" pots, \$0.50.

THE DOCTOR. Elsewhere described.

TRAILING QUEEN. Medium sized single flowers with red sepals, violet purple petals, very distinct trailing habit.

TREASURE ISLAND. Elsewhere described.

FUCHSIAS WITH VARIEGATED FOLIAGE

PILLAR OF GOLD. Beautiful deep golden bronze foliage, red flowers.

SUNRAY. Silvery white and green foliage. Rosy purple corolla and salmon sepals.

WAVE OF LIFE. Bright gold and yellow foliage, purple corolla, scarlet sepals.

SPECIES

ALPESTRIS. (Brazil). The discoverer of this Fuchsia claimed that it is the tallest of all climbing Fuchsias. Young foliage has an attractive reddish tint. Small red and purple flowers. Very vigorous.

Complete Landscape Service and Supervision

ALPESTRIS REEVESI. (E & R). With us has been ever-green. Vigorous climbing type. Purple and red flowers. Very valuable as a landscape subject where a graceful arching shrub or climbing shrub is wanted. Practically in bloom all the time. Highly recommended.

ARBORESCENS. (*Syringae flora*). **Mexico.** Very strong, vigorous grower. Makes in time, a small tree. Erect, terminal panicles of small rosy lilac flowers in clusters. Very often mistaken for a lilac. Does well near the coast in full sunlight.

AUSTRA-MONTANA. A newly discovered species from South America. Extremely interesting. Attractive dark green foliage, with single, brilliant orange flowers about three inches long, flaring wide at the end of the tube. Offered for the first time; highly recommended. 4" pots, \$0.75.

BACILLARIS. (**Mexico**). A very pretty and interesting species. Small, light green foliage. Profusion of small red flowers with flaring mouth. Makes either a good bush or a fine standard or climber. Rare.

BOLIVIANA. Stands good deal of sun and heat. Tall growing, free blooming. Clusters of long thin scarlet-red flowers.

CORALLINA. (**Exoniensis**). Large single flowers, scarlet sepals, deep purple corolla. Makes a fine plant to train up the side of a wall or building, or over a wall.

CORYMBIFLORA. (**Peru**). Tall and spreading, large, handsome foliage, very long brilliant red flowers borne in clusters. A beautiful and aristocratic plant.

CORYMBIFLORA ALBA. Same habit as preceding, petals of deep pink with long white tubes.

FULGENS. (**Mexico**). Large tomentose, light green foliage, flowers in clusters with orange vermillion corolla. Orange pink tube with green tipped sepals. Vigorous and free growing type. Fine plant for wall and trellis. Always interesting. Profuse bloomer.

FULGENS GOSELLI. A hybrid of the preceding, with large glossy green foliage, suffused with light purple. Clusters of flowers with large tubes of scarlet. New and rare. 4" pots, \$0.75.

ISIS. (**Mexico**). Bushy and compact. Small glossy blue-green foliage. Quantities of minute crimson flowers. Stands the sun well.

LYCIOIDES. (**South America**). Tall upright shrub with medium sized rosy red flowers on terminals. Tube and sepals lighter red. Much used for hybridizing.

MAGELLANICA ALBA. Strong grower, light green foliage, myriads of small single flowers of very delicate lavender, sometimes pure white.

Garden Renovation and Consultation

MAGELLANICA GRACILIS. (Chili and Peru.) One of the first Fuchsias introduced into cultivation. This plant in our old garden attained a height of 25 feet. A very vigorous growing type, profuse bloomer. Small, narrow leaves, small flowers with red sepals, short purple corolla.

MAGELLANICA GRACILIS VARIEGATA. Flowers same as the type, silvery white variegated foliage.

ROSA SANCTAE. Another new species from South America. Attractive light green foliage, with vermilion scarlet flowers. Very interesting. 4" pots, \$0.50.

SERRATIFOLIA. (Peru). Medium to low grower. Needs a sheltered cool situation. Long tube of waxy cerise, fading to blush. Green tipped sepals and petals of bright orange. One of the most beautiful of all Fuchsias. Rare. 4" pots, \$0.50.

SPLENDENS. (Mexico). Extremely vigorous grower. Climbing type. Dark green, rather hairy foliage. Flowers quite different from all other Fuchsias. Bright red tubes with green sepals. Will stand sun.

THYMIFOLIA. (Mexico). Very small flowers in great profusion with minute crimson sepals. Tube of lighter shade. Prominent white stamen.

VIRGATA. (Mexico). Bushy grower, rather compact in habit. Attractive foliage, with a profusion of red and purple flowers. Stands sun well. Makes a splendid flowering shrub. Hardy.

Our Landscape Department will be glad to help you select the proper place and plan your Fuchsia garden. Estimates gladly given.

BEGONIAS

EVANS & REEVES NURSERIES have one of the finest collections in the country of these shade-loving plants. The varieties we grow include all types, bedding, fibrous, tree types, tuberous, etc. They must be seen to be appreciated and all lovers of these beautiful plants are urged to visit our display gardens, famed for its fine Begonia collection. Following is a partial list of our collection. PRICES (except where noted): 3" pots, \$0.35; 4" pots, \$0.50; 6" pots, \$1.00 and \$1.50. Larger specimens, \$2.00 to \$10.00.

FIBROUS BEGONIAS (Tree Form)

(Big Growers, up to ten feet, huge clusters of bloom).

CORALINE LUCERNE. Largest of all, immense clusters of deep pink flowers.

PRESIDENT CARNOT. Brilliant red.

HELEN. White. \$0.75.

DE LESSEPS. Pink-white.

ROSSI. Light pink.

GENEVA. Spotted leaves, pink flowers.

ARGENTEA GUTTATA. Heavily spotted leaves, greenish-white flowers.

MAYBELLE E. Dark silver-spotted leaves, flowers red, white centers. \$0.75.

HELEN KING. Dark metallic leaves, pink blossoms. \$0.75.

RUBRAS. (Angel Wing). In colors of red, pink and salmon.

RUBRA ODORATA. Fragrant deep rose. \$0.75.

ALBA PERFECTA. Dainty white.

SHASTA. Large white. \$0.75.

MARTHA. Medium grower, deep red. \$0.75.

MARY. Very bushy, red flowers.

OTHER TALL TYPES

MULTIFLORA ROSEA. Small flowers of delicate pink small foliage.

FUSCHIOIDES. Similar to above, flower scarlet.

WALLOW. One of the finest of all, beautiful dark foliage, white flowers. \$0.75.

SCRIPPS SEEDLING. Handsome dark foliage, a really beautiful plant. \$0.75.

MEDIUM GROWTH

- PREUSEN.** Small foliage, profusion of pink blossoms. Fine pot plant.
- SACHSEN.** Similar, with bronze foliage and red blooms.
- MARGUERITE.** Delicate pink flowers, bushy grower, metallic green foliage.
- LADY WATERLOW. (Impr. Digswelliana).** Bushy, with small foliage and a profusion of tinted pink and white blossoms. One of the prettiest of all.
- ROBUSTA.** Small foliage, blooms pink to red. Stands sun.
- ODORATA ALBA.** Spreading bush with large clusters of fragrant white flowers that are very showy. A fine variety.

LOW GROWING

- McBETHII.** Semi-tuberous, bushy habit, fern-like foliage white flowers.
- DREIGI.** Like above with darker foliage.
- SUTHERLANDI.** An orange-flowered form.
- NITIDA.** Good bushy grower, white flowers.
- CORBEILLE DE FEU.** One of the finest specimen plants. Blooms of vivid coral-red.

PROCUMBENT TYPES

- RICINAFOLIA.** Huge hairy leaves from the root bloom, stalks 3 and 4 feet long, clusters of pink flowers 12 inches across.
- SANGUINEA.** Dark olive foliage, bright red underside, very pretty white flowers.
- TEMPLINI.** Very ornamental, with large wavy leaves of red, white and yellow.
- VERSCHAFELTI.** Huge green leaves on fleshy stems, large clusters of pink flowers.

SCHARFFIANA TYPES

- SCHARFFIANA.** Bushy grower, beautiful fuzzy foliage grey-green above, red underneath, beautiful white blossoms on long stems. Very fine for baskets.
- HAAGEANA.** More upright, leaves longer, large clusters of pendant flowers tinted pink. Very showy.
- THURSTONI.** Similar, with foliage dark and shiny, pink blossoms.
- DOROTHY GRANT.** A giant variety, with very large dark-varnished leaves, and white blossoms. A spectacular type. 4" pots, \$0.75.
- VIAUDE.** Like Scharffiana, taller with longer leaves and larger flowers.

Complete Landscape Service and Supervision

METALLICA. Handsome metallic foliage, large pink blossoms.

NELLIE BLY. Bushy habit, grey and copper-green foliage, tinted pink flowers.

PRUNIFOLIA. Large hairy leaves, deep plum underside, large droopy white flowers. \$0.75.

FRUTICOSA. Leathery foliage varying from almost black to olive-green, red underside and white flowers.

MARIETTA. Beautiful wavy foliage of glossy dark green, dark red underneath. 4" pots, \$0.75.

CLIMBING KINDS

ALBA SCANDENS. Light green foliage and white flowers. Clings like ivy.

GLAUCOPHYLLA SCANDENS. A beautiful scandent variety with pink blossoms that makes one of the finest baskets we have seen. Very scarce. 4" pots, \$1.00.

MARJORIE DAW. Much-branched climbing type with beautiful rosy-red blooms.

RARE TYPES

DIADEMA. Silver-spotted palmate foliage, tall grower. \$0.75.

SUPERBA. Beautifully cut and spotted foliage. \$0.75.

BEDDING BEGONIAS

LUMINOSA COMPACTA. Compact dwarf habit, brilliant scarlet flowers.

PINK PEARL. Compact, flowers of soft rose-pink.

WHITE PEARL. Similar, with flowers of white.

CARMEN. Beautiful bronze foliage, flowers pink.

CARMINE. Light green foliage, deep red flowers.

Many unnamed seedlings in white, pink, rose, scarlet and red.

(All above: 3" pots, \$0.20; 4" pots, \$0.35.)

ROTE PERLE. Compact, bright scarlet.

ROSA PERLE. Compact, soft rose.

TUBEROUS BEGONIAS

We believe our Tuberous Begonias to be unequalled anywhere at any price for size, superb form and sheer beauty of exquisite colors. These bulbs are from one of the finest strains in the world today. Blooming plants in pots are available all through spring and summer in the "camellia," "carnation," "cristata" "single" and "Lloydi" or pendant types. A visit to our display gardens when these beautiful plants are in bloom is a rare treat. 4" pots, \$0.35; 5" pots, \$0.50 to \$0.75; 6" pot, \$1.00 up.
